

the chosen domain haraj.com,
and i will start with the login page

String input: @notEmpty
String password:@NotEmpty.@Size(min=8)

posting page, we have title, phone number, description

String title:@NotEmpty, @Size(min =3) @Pattren(regex to check that it contains litters)

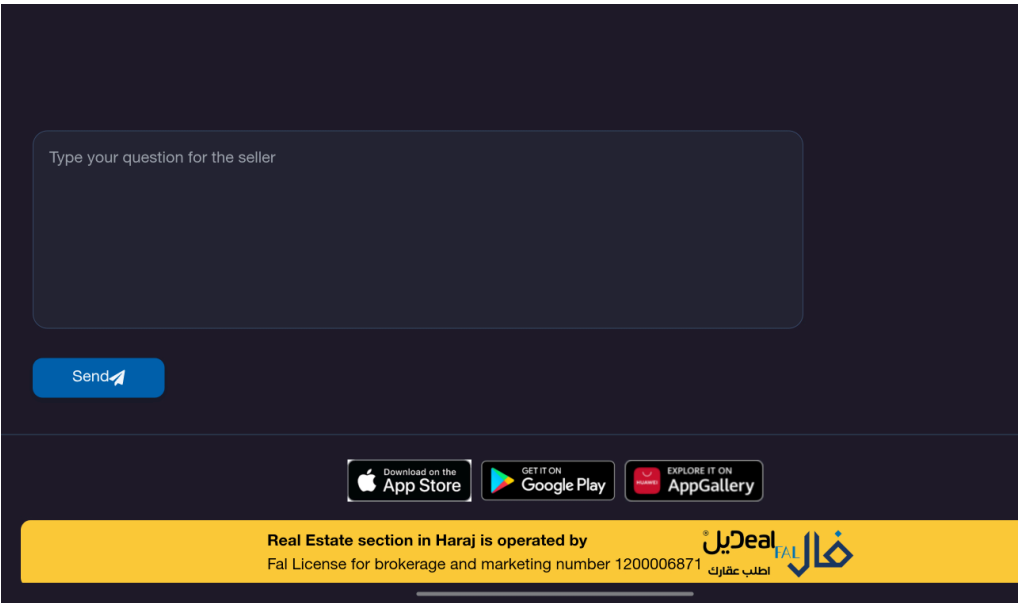

String phone number: @Pattern(regex to insure that it is starting with 966 and only numbers and 12 long)

String description: @Size(min =10,)

extra:

LocalDateTime: it should take the date and time of posting so it limit the posting perday

next is posting a comment

@NotEmpty
@Size(min=10)
